## Document Body

Hi Folks,

Sorry for the change, but HDOH has proposed a new date for their visit -- how does the week of feb 26th look? They have attached a proposed 2-day agenda for their trip with one day

targeted for toxicologists and risk issues and the other day focused on sampling strategies and lab techniques. Section chiefs, please let me know if there are others who may benefit from attending.

Please let me know your availability for the week of 2/26 -- I'd like to schedule the meetings for either Tues/ Wed (2/27 and 28th) or Wed/Thurs (2/28 and 3/1).

thanks,  
Eugenia

SubjectNew dates and proposed Agenda for R9 EPA meeting

Aloha Eugenia,

Thank you for working so quickly with R9 staff to facilitate the proposed technical meeting. We are eager to come and meet with you to talk about some of the techniques we are currently implementing in Hawaii under the State Contingency Plan. We'd appreciate EPA's technical input and we'd like to explore appropriate avenues to use these techniques on federal projects. For example, we would very much like to incorporate multi-increment sampling into our generic sampling plan for PA/SI Sampling of Opportunity. We'd also like to discuss the opportunities for using these techniques for some DSMOA work under CERCLA and perhaps for SI investigations.

Looking at the agenda, the preparation we'd like to do and our schedules, we would now prefer delaying the trip until late February or early March. Would the week of February 26th work for you? We've drafted an sample agenda up for two days - one targeted for toxicologists and risk issues (areawide arsenic investigation, use of bioaccessibility testing, and chlordane/termaticide concerns), and a second day focused on sampling strategies and lab techniques (use of multi-increment sampling, large area sampling, as well as soil leaching concerns and SPLP testing).

It is great that Gail Jones is interested in participating, as she attended Chuck Ramsey's training. We'd like to see other members of the QA group there as well, particularly for federal facilities. We'd like to get an idea of the EPA audience, so perhaps you could put together a short list for us? I believe you said Sophia is available; will other toxicologists join us as well? Finally, you mentioned Technical Support Group - I'm not not sure who these folks are. Would we want to include others, such as Herb Levine on the sampling and leaching discussions?

Let's talk early next week to come to agreement on an effective and constructive meeting plan. I apologize for changing the proposed meeting time.

Thanks so much

Fenix
